Congratulations!

Thank you for purchasing the Wet Sounds WS-TB-MIC.

The WS-TB-MIC talk back microphone allows the driver to communicate with the riders or other vehicles in the area. By pushing the button on the microphone, the system will automatically mute the music playing from the connected channels and allow you to use them as a PA system. Once the button is released, the interrupted channels will resume playing at their previous volume.

Hardware Included:

- WS-TB-MIC Box
- PTT Microphone
- Mic Volume Controller
- 4 Pin Connector
- (2) 3.5mm Female to Male Extension Cables
- (4) Phillips Stainless Steel WS-TB-MIC Box Mounting Screws
- (2) Phillips Stainless Steel Mic Vol. Controller Mounting Screws
